31 March - Blue Mountain - Sydney Zoo

1 April Group Exploration Day - Bronte Beach

2 April Group Exploration Day - Australia Museum

3 April Sydney Airport

We had just returned from Parramatta when we coincidentally witnessed a beautiful sunset as we disembarked from the ship. We decided to pause and spent a considerable amount of time here because we wanted to capture numerous photos of this remarkable sunset.

This photo was taken on the last day of our trip.

We walked by a convenience store and found that there was a flying simulator which was exactly the same as the cockpit of an airplane. Although it took quite an amount of money for the experience, we all agreed that it was totally worthed as we might not have such an experience anymore.

This photo was taken on the second last day of our trip. It was a free day and we planned to go to the Bare Island which was introduced by a tour guide a day before. But unfortunately, we found that we had to join a escorted tour to get to the island. Luckily, we could enjoy the brilliant sunset next to the Macquarie tower which is next to the Bare Island.

We took the Sydney train back to the hostel and found that they had a very different design than Hong Kong. They have two levels of seats which are uniquely suited for the massive population on using the public transport system.
